

Longopac® Flex TROLLEY

– simply smarter

Hygienic, efficient,
and flexible solution
for handling waste
during cleaning

- Hygienic
- Efficient
- Environmentally friendly

Longopac Flex Trolley streamlines waste management processes within the cleaning industry in a hygienic and environmentally friendly way.

Our new Longopac Flex Trolley cassette holder is both flexible and adaptable, which means it can be installed on most cleaning carts. The cassette holder is loaded with our Longopac bagging system, which has previously streamlined the waste management process in many industries.

In the Longopac system, bags are adapted according to the quantity of waste, not vice versa. Longopac's design also

means that a new bag is always available. The system also improves levels of health and safety as it affords more hygienic cleaning as the user avoids coming into contact with any waste. This is hygienic, economical and climate smart as the bags always have a 100 % fill level.

The holders are available in Mini and Midi sizes.

HYGIENIC

- Bags are replaced and sealed from the outside – no contact with the waste.
- Spillages around the opening are collected by the next bag.
- Simple to clean.

EFFICIENT

- Longopac Flex Trolley is loaded with a Longopac bag cassette 60 or 85 meters in length.
- Variable bag size for flexible changing intervals.
- New bag always in place.
- Bag always securely sealed.
- Quick bag replacement – less than 30 seconds.
- Less cleaning – waste never misses the bag.
- Variable bag size always ensures bags are 100 % full.

ENVIRONMENTALLY FRIENDLY

The cassette holder is loaded with a cassette that is available in a variety of strengths and colors. The cassette is called Longopac.

- Longopac bag material is made from 3-ply polyethylene, which affords low raw material use in combination with a high level of strength.
- Life cycle analyses show that it has 1/3 of the environmental load compared to traditional bags.
- Always 100 % fill level.

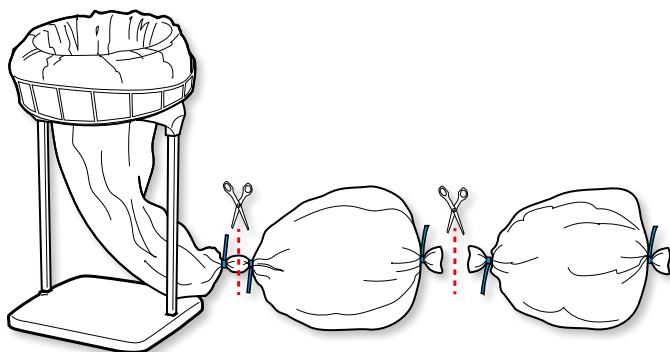

MINI

Height 159 mm
Width 374 mm
Depth 264 mm
Opening 284x164 mm

MIDI

Height 159 mm
Width 406 mm
Depth 403 mm
Opening 302x289 mm

INSTALLATION

The Mini and Midi holder is designed to be attached to a 6 mm steel profile, commonly used by several cleaning trolley manufacturers, meaning that it fits many different types of cleaning trolleys.

Midi Gitter is a special variant for wire trolleys. It can be attached to trolleys with a minimum mesh aperture of 50 mm and a wire diameter of 4–8 mm.
